

Tier 1 universal practices	Tier 2 targeted practices	Tier 3 individualized practices
 Providing universal whole group support through structures and routines during class time Ensuring the structures and routines are clear, explicit and predictable Making room for some flexibility and a few options for the children to choose from within the daily routine without disrupting the consistency and predictability 	 Providing targeted accompaniment for some children who require additional support through complementary structures and routines (either in class or in an alternate location during station-based activities, at recess/lunch indoors or outdoors) Keeping in mind that children at Tier 2 benefit from small-group activities (2-4 children), which are structured both during class time and while outdoors 	 Providing individualized accompaniment for a child who requires more intensive/personalized support through complementary structures and routines in the classroom and in an alternate location Keeping in mind that children at Tier 3 benefit from one-to-one activities, structured by a significant adult, and providing breaks away from the group in an alternate location
 Cueing the adult's expectations around morning arrival, transitions, lining up, clean-up time, snack time, bathroom time, end-of-day departure, etc. 	 Keeping in mind that small-group activities can be setup within the whole group context (e.g. organizing stations during class time, having multiple simultaneous 	☐ Ensuring safety at all times; children at Tier 3 require constant supervision due to their high defendedness and intense reactions
 Orchestrating <u>practice sessions</u> (introducing, modeling, scripting) through play, stories, chants, puppets, role-playing, etc. 	small-group outdoor games) – this will require additional adults to orchestrate (support staff, volunteer parents)	☐ Sharing the weight – no single staff is meant to support a child at Tier 3 on their own on a full-time basis
 □ Narrating, in an engaging and positive way, concrete examples of 'what to do' and 'what not to do' for each adult expectation 	 Relying on the structures and routines to have the children follow through with the adult expectations (this will help reduce adult talking/giving directives, which may cause less resistance/opposition) 	☐ Giving priority to collaboration, teamwork, as well as ongoing communication amongst all adults working with the child
 Matching a specific song to each routine to build predictability and multi-sensory cueing 	☐ Keeping in mind that children at Tier 2 benefit from having an individual bin to 'reserve' items of interest for a duration of	☐ Building a 'village of support' – the child needs to feel a 'safety net of attachments' with the team of adults involved. Feeling safe is key for the child to be successful
 Giving the children enough advance notice to help prepare them before switching to the next activity 	time. These are changed regularly to help the child 'let go' of items and become more at ease to share with others	☐ Providing systematic daily one-to-one <u>check-ins and end-of-day recap</u> with a significant adult scheduled multiple
☐ Keeping in mind that K4-K5 children have a short attention span and making sure the activities are no longer than 15-20 minutes (breaking down each activity into manageable increments)	 Ensuring safety at all times, as children at Tier 2 require ongoing supervision due to their big emotions, immaturity and lack of impulse control 	times each day. Ensuring that the check- ins are being done consistently by the same adult and that the child is indeed benefiting

Well established <u>structures and routines</u> at each Tier – K4-K5

Tier 1 universal practices	Tier 2 targeted practices	Tier 3 individualized practices
 □ Keeping in mind that K4-K5 children need to be active and making sure to include movement (or flexibility to switch positions between sitting, kneeling, standing, etc.) during activities □ Keeping in mind that K4-K5 children don't manage well when there are too many transitions and too many adults (e.g. combining a recess to an outdoor activity to limit an extra transition) - Please note that recess is not mandatory in kindergarten and that there is flexibility in setting up a schedule that would be adapted to the children's needs □ Notifying the children, when possible, of any changes in routine, such as special activities, guests, and staff absences - Ensuring the notification of the staff absence is done shortly prior to the actual date to not create too much anticipatory stress - Understanding the importance of having the children face these types of life realities in order to adapt to them and build resilience □ Referring to the document on the 4-year-old versus the 5-year-old for more details 	 Minimizing the number of adults involved, as children of this age do not orient well towards several people at once Ensuring good communication amongst all adults involved (including the parents) is key, acting as a 'baton-relay' team Setting up systematic check-ins with a significant adult (beyond teacher greeting) at scheduled times In addition to notifying the children of any changes in routine (special events, guests, staff absences), preparing for the arrival of a substitute staff, matchmake if possible If needed, setting up an alternate classroom entrance-exit time (e.g. 5 min before or after the bell) to help with transitions If needed, providing a visual schedule, which is easily accessible to the child 	 □ If needed, previewing tasks/activities that are triggering for the child (e.g. use of Play-Doh, glue, finger painting, scissors, etc.) with one-to-one practice in an alternate location outside of the whole group context □ Providing time to play with items in their individual bin in an alternate location with a projected timeline of returning the items to the classroom for group use □ Having an adapted schedule with blocs of time outside the classroom. By providing an adapted schedule, they will gradually acclimate to the context and be able to better manage their emotions □ Providing a personalized visual schedule, which is easily accessible to the child □ If needed, having the child go to an alternate location with a significant adult when there's a substitute teacher □ If needed, setting up a part-time schedule for those who require it. Some children struggle with the amount of stimulation within the classroom. Ensuring to follow up with the child and 'bridging' the distance when away from school
